How do I use the strip?

1. Add 1 teaspoon of water to an empty baggie or a plastic bottle cap.

2. Combine the drug into the water.

3. Dip the test strip in the water mixture up to the 1st line and hold for 15 seconds.

4. Take the strip out of the water, place it on a flat, sterile surface, and wait 60 seconds.

5. Look at the strip for results. Even very light red lines count!

TWO (2) red lines means... NO XYLAZINE

ONE (1) red line means... XYLAZINE

No drug is completely safe. Avoid using alone and make sure someone is with you who can give you naloxone (Narcan) or call for help if you need it.
