

Layperson Naloxone (NARCAN) Administration

How to Recognize and Respond to
an Opioid Overdose

Course Overview

Participants will learn steps to prevent an opioid overdose, how to recognize the signs and symptoms of an opioid overdose, information about naloxone and how it works, how to administer intranasal and intramuscular naloxone, and what to expect after administration. Also includes a brief review of the opioid health crisis current conditions and trends, naloxone laws, and how to access naloxone.

This course is for laypersons which includes, but not limited to: businesses, organizations, community members, correctional facilities, educators, faith groups, government, health care professionals, parents and caregivers, pharmacies, school nurses, senior living facilities, sober living communities, treatment and recovery centers, etc.

What People Are Saying

"I now feel confident in my ability to help someone that is undergoing an opioid overdose. I am thankful that this course worked to eliminate stigma surrounding opioid use and addiction."

- Recognize the signs of an opioid overdose.
- Demonstrate how to administer the opioid overdose reversal drug Naloxone.
- Discuss the role of harm reduction in the overall opioid public health crisis solutions / action plan / strategy.
- List a minimum of three overdose prevention tips for people who use drugs (PWUD).

"The prevention and solution information and tips the course provided will allow me, as a health professional, perform a better job for our community."

"The course helped me understand when someone is having or had an overdose and how I can help them until 911 arrives. I learned that early intervention with naloxone whenever possible is one of the best things you can do."

Layperson Naloxone Administration (LPN)

Course Outline

- I. Brief Review of the Disease of Addiction
- II. Opioid Overview
 - A. The Opioid Family of Drugs
 - B. Tips to Reduce Prescription Opioid Risks
 - C. Fentanyl 101, Exposure Risks, Safety / PPE
